Anyone interested in a trip To Danville, Kentucky for Geodes Labor Day Weekend please speak with Cheryl.

A deposit of \$100.00 will be necessary to hold your spot. Limit to the first 20 people. Pending interest we can determine transportation.

## Let the Adventures Begin!

### Quotes from Albert Einstein....

German born physicist (1879) who developed the special and general theories of relativity in 1921. He won the Nobel prize for physics for his explanation of the photoelectric effect. He died in Princeton, NJ in 1955.

$$"E=mc^2"$$

**"It followed from the special theory of relativity that mass and energy are both but different manifestations of the same thing — a somewhat unfamiliar conception for the average mind. Furthermore, the equation  $E = mc^2$ , in which energy is put equal to mass, multiplied by the square of the velocity of light, showed that very small amounts of mass may be converted into a very large amount of energy and vice versa."**

**"When a man sits with a pretty girl for an hour, it seems like a minute. But let him sit on a hot stove for a minute and it's longer than any hour. That's relativity."**

**"Two things are infinite: the universe and human stupidity; and I'm not sure about the universe."**

**"There are only two ways to live your life. One is as though nothing is a miracle. The other is as though everything is a miracle."**

**"I am enough of an artist to draw freely upon my imagination. Imagination is more important than knowledge. Knowledge is limited. Imagination encircles the world."**

**"If you can't explain it to a six year old, you don't understand it yourself."**

**"Logic will get you from A to Z; imagination will get you everywhere."**

**Outside  
the  
Box!  
A synopsis of  
last month's  
meeting**

Last month we were treated to a lecture and demonstrations on the energy frequencies of various rocks and crystals.

Our guest speaker, Kathleen S, an engineer for over 30 years, became fascinated with frequencies of objects, which led to her interest in the earth and the earth's objects, including rocks and crystals. She explained how rocks and crystals promote health-mentally, physically and emotionally.

Kathleen brought a system which projects an individual's auric field and the effects gemstones have on their field.

Kathleen also sat one-on-one with interested members to read their auras.

### Snowflake

**This month we will be making lovely snowflakes which you can use as a suncatcher or as an ornament – or both. See the website for a preview of this fun activity!**

**Please bring the following tools:**

**Round nose plier**

**Wire cutter**

**Towel to keep beads from rolling**
